Reflexology, also known as **zone therapy**, is an [alternative medicine](#) involving [application of pressure](#) to the feet and hands with specific thumb, finger, and hand techniques without the use of oil or lotion. It is based on a pseudoscientific system of zones and reflex areas that purportedly reflect an image of the body on the feet and hands, with the premise that such work effects a physical change to the body. There is no convincing evidence that reflexology is effective for any medical condition.
