### **FYI: Car Maintenance Education**

**Submitted by: Jos Portmann**

"General guidelines when washing a car ... Never wash your car when the body is hot, such as immediately after driving it or after it has been parked in the direct sunshine ... Don't move the sponge in circles. This can create a light, but noticeable scratches called swirl marks ... Rinse all surfaces thoroughly with water before you begin washing to remove loose dirt and debris which could cause scratching ... Work the car-wash solution into a lather with plenty of suds that provide lots of lubrication on the paint surface ... Don't let the car dry when you're done and don't expect to drive around the block to do an effective job. Don't use an abrasive towel or other material that can leaving hairline scratches in the paint; use a chamois or soft terry towel; blot the water up instead of dragging the towel or chamois".
